Introduction	ix
Executive Summary of Empirical Findings	xvii
Part I. Empirical Findings	
Chapter 1. Dynamics of Interacting Elk Populations Within and Adjacent to Rocky Mountain National Park	3
Introduction	4
Methods	6
Direct Estimates	6
Population Models	8
Results	9
Winter Range Locations	9
Direct Parameter Estimates	9
Population Model	14
Discussion	16
Management Implication	20
Literature Cited	21
Chapter 2. Long-Term Changes in Willow Distribution on the Winter Range of Rocky Mountain National Park	25
Introduction	26
Methods	27
Study Sites	26
Historical Changes in Land Use, Elk, and Beaver	27
Digital Map Generation	28
Low-Resolution Digital Maps	28
High-Resolution Digital Maps	28
Data Analysis	31
Results	32
Low-Resolution Digital Maps	32
High-Resolution Digital Maps	34
Comparison Between Low and High-Resolution Maps	38
Discussion	39
Conclusions	42
Literature Cited	43
Chapter 3. Vegetation Responses to Natural Regulation of Elk in Rocky Mountain National Park	47
Introduction	48
Definitions of Overgrazing	49
Description of the Study Area and Elk Populations	50
Study Area	50
Elk Populations	51
Methods	52
Vegetation Trends	52
Elk Use	52
Statistical Methods	54
Results	55

Contents (continued)

	Page
Trends in Elk Habitat Use	55
Grassland Transects	55
Meadow Transects	55
Aspen Transects	56
Willow Transects	58
Sagebrush Transects	58
Bitterbrush Transects	58
Discussion	58
Vegetation Trends	58
Research and Monitoring Recommendations	65
A Clear Statement of Questions and Needs	65
Monitoring of Ungulate Populations	65
Experimental Design	65
Acknowledgments	67
Literature Cited	67
Chapter 4. Factors Influencing Plant Productivity in Shrub Communities on Elk Winter Range of Rocky Mountain National Park: Experiments on Elk Herbivory, Water Availability, and Burning	71
Introduction	72
Study Area and Treatments	74
Methods	75
Hydrological Monitoring	75
Beaver Surveys	75
Shrub and Herbaceous Production	75
Nutrient Analyses	76
Statistical Analyses	78
Results	78
Hydrological Monitoring	78
Beaver Populations	80
Plant Production and Nutrient Responses to Water Manipulations and Herbivory Treatment in Willow Sites	80
Plant Production Responses to Burning and Herbivory in Bitterbrush Sites	85
Discussion	86
Management Recommendations	90
Literature Cited	91
Chapter 5. Changes Induced by Elk Herbivory in the Aboveground Biomass Production and Distribution of Willow (<i>Salix monticola</i> Bebb): Their Relationship with Plant Water, Carbon, and Nitrogen Dynamics	95
Introduction	96
Materials and Methods	96
Statistical Analysis	98
Results	98
Hydrological Conditions for Willow Growth	98
Phenology and Leaf Area Dynamics	98
Plant Biomass	99
Gas Exchange	101
Plant Nitrogen	102
Discussion	103
Acknowledgments	106
Literature Cited	106

Contents (continued)

	Page
Chapter 6. Effects of Herbivory and Proximity to Surface Water on C and N Dynamics on the Elk Winter Range in Rocky Mountain National Park	109
Introduction	110
Methods	111
Study Sites	111
Experimental Treatments	111
Litterfall	111
Litter Decomposition	111
Elk Dung Quantification	112
Soil Characteristics and N Availability	112
Nitrogen Fertilization	113
Statistical Analyses	113
Results and Discussion	113
Litterfall	113
Litter Decomposition	115
Return of N to the Soil	117
Soil Characteristics and N Availability	118
Conclusions	122
Acknowledgments	122
Literature Cited	122
Chapter 7. Carbon and Water Relations of <i>Salix monticola</i> in Response to Winter Browsing and Changes in Surface Water Hydrology: An Isotopic Study Using $\delta^{13}\text{C}$ and $\delta^{18}\text{O}$	127
Introduction	128
Materials and Methods	129
Study Sites	129
Experimental Treatments	129
Field Measurements of Carbon and Water Relations	129
Isotopic ($\delta^{13}\text{C}$) and Nitrogen Analyses	130
Plant Water Extraction and $\delta^{18}\text{O}$ Analysis	130
Statistical Analysis	131
Results	131
Precipitation	131
Summer Rainfall	132
Total Plant Water Potentials	133
Instantaneous Photosynthetic Rates	133
Leaf Nitrogen	134
Leaf Carbon Isotope Discrimination	134
$\delta^{18}\text{O}$ of Precipitation, Stream Water, and Plant Xylem Water	135
Discussion	136
Acknowledgments	139
Literature Cited	139
Chapter 8. Isotopic Evidence of the Effects of Herbivory and Landscape Position on Plant Nitrogen Sources in a Riparian Ecosystem	143
Introduction	144
Methods	145
Study Sites	145
Grazing Treatments	145
Design of Preliminary Experiment in 1997	145

Contents (continued)

	Page
Experimental Design and Sampling in 1998	145
Isotopic Analyses	146
Statistical Analyses	146
Results	146
Preliminary Experiment – 1997 Growing Season	146
1998 Growing Season	147
Discussion	149
Effect of Landscape Position on N Sources	152
Effect of Herbivory on N Sources	152
Summary and Conclusions	153
Acknowledgments	153
Literature Cited	153
 Chapter 9. Response of Tannins and Phenolics of Willows to Simulated Herbivory, Water Dynamics, and Ambient Elk Herbivory on the Elk Winter Range of Rocky Mountain National Park	157
Introduction	158
Study Area and Treatments	160
Isolation and Quantification of Tannins	162
Isolation and Quantification of Phenolics	162
Statistical Analysis	162
Results	163
Tannin Responses to Treatments in 4-Year Exclosures	163
Phenolic Responses to Treatments in 4-Year Exclosures	163
Phenolic and Tannin Production in Willows Protected from Grazing for 35 Years	167
Willow Litter Phenolics and Tannins	167
Discussion	168
Species Differences	168
Phenolic and Tannin Production in Willows as Related to Water Table and Treatments	168
Response of Tannins and Phenolics to Treatment in the 35-Year-Old Exclosure Compared to the 4-Year-Old Exclosure	171
Summary	171
Literature Cited	172
 Chapter 10. Influence of Elk Grazing on Soil and Nutrients in Rocky Mountain National Park	175
Introduction	176
Site Description and Methods	177
Results	178
Discussion	183
Acknowledgments	185
Literature Cited	185
 Chapter 11. Sustainability of Vegetation Communities Grazed by Elk in Rocky Mountain National Park	187
Study Area	190
35-Year Exclosure Sites	190
4-Year Exclosure Sites	190
Methods	190
Nitrogen Pools	190
Nitrogen Fluxes	191
Statistical Analysis	193
Biogeochemical Modeling	193

Contents (continued)

	Page
Results	193
Nitrogen Pools	193
Nitrogen Fluxes	195
Biogeochemical Modeling	197
Discussion	198
Management Implications	201
Acknowledgments	201
Literature Cited	202
 Chapter 12. Ecological Evaluation of Potential Overabundance of Ungulates in U.S. National Parks: A Case Study 205	
Introduction	207
Ungulate Population-Predator Limitation Approach	207
The Biodiversity Approach	209
The Grazing Optimization and Sustainability Approaches	210
The Overgrazing Approach	210
The Allowable Use Approach	210
Study Objectives	211
Study Area	211
Methods	211
Population Analyses and Elk Concentrations	211
Vegetation Sampling Locations	215
Elk Density Correlates to Willow Growth--Grazing Optimization	216
Effects of Elk on Plant Species Diversity	216
Grazing Sustainability or Optimization Measures	217
Allowable Use Measures	218
Potential Overgrazing Measures	218
Results	218
Elk Population Analyses and Potential Overconcentrations	218
Correlation of Elk Density to Willow Growth	221
Effects of Elk on Plant Species Diversity	221
Any Evidence for Potential Overgrazing	227
Elk Consumption Rates	227
Effects of Elk on Ecosystem Sustainability	232
Discussion	232
Population-Based Predator Limitation Approach	232
Effects of Elk on Plant Community and Plant Species Diversity	233
The Sustainability Approach Applied to Rocky Mountain National Park	234
Evidence for Overgrazing	235
The Allowable Use Approach Applied to National Parks	235
Conclusions	236
The Overgrazing Approach	236
The Allowable Use Approach	237
The Biodiversity and Sustainability Approaches	237
The Population-Based Predator Limitation Approaches	237
Literature Cited	238

Contents (concluded)

	Page
Part II: Modeling	
Executive Summary of Model-Based Assessment of Elk in the Rocky Mountain National Park Ecosystem	251
Model Description and Data Inputs	252
Model Verification: The Control Run for 1949–1998	253
Model Experiments	255
The Period Before Reintroduction of Elk (1775–1910)	255
Establishment of the Park and Reintroduction of Elk (1911–1948)	257
Effects of Elk, Elk Management, and Simulated Wolf Predation (1948–1998)	259
Experiments with Elk and Beaver Densities	259
Alternative Elk Management and Vegetation Fencing Scenarios	260
Sensitivity to Wolf Submodel Parameters	260
Management Implications	264
Literature Cited	264
Acknowledgments	267
